

PROPOSED GOALS

INFRASTRUCTURE

1. Provide adequate public facilities and services for all services which the City provides.
2. Maintain an adequate level of public water and sewer service, designed to manage the pattern of growth in accord with the Comprehensive Plan.
3. Coordinate the location and design of all City public facilities with the goals and policies of the Comprehensive Plan.
4. Provide trails and bikeways to link parks and neighborhoods.
5. Achieve a safe, efficient, economical and multi-modal transportation system, including non-motor vehicle modes and public transportation, while recognizing that pressures for increased motor vehicle travel will continue.
6. Balance the priorities of motor vehicles with those of bicycles and pedestrians in the design of roadways and land use patterns so that most residents have the choice to walk and bicycle conveniently to shopping, schools and recreation.
7. Coordinate land use and public facilities development with the transportation system in order to ensure safety, efficiency and convenience.
8. Provide adequate transportation facilities and services that meet the City's adopted service standards.
9. Provide adequate transportation access to the City's waterways.
10. Coordinate the City's transportation system with the regional transportation network to promote commerce and emergency evacuation routes.
