

TABLE OF CONTENTS

1. EXECUTIVE SUMMARY 1

2. INTRODUCTION 3

3. WATERSHED ISSUES & BACKGROUND 5

4. COMPUTER MODELING 6

4.1 DATA SOURCES & PROCESSING 6

4.2 MODEL DEVELOPMENT & SELECTION OF PARAMETERS 6

4.2.1 *Rainfall Hyetographs* 6

4.2.2 *Subarea Delineation* 6

4.2.3 *Subcatchment Imperviousness, Roughness & Depression Storage* 7

4.2.4 *Subcatchment Basins* 7

4.2.5 *Green-Ampt Soils Parameters* 7

4.2.6 *Drainage Network Discretization (Links and Nodes)* 8

4.2.7 *Open Channel Approximations* 8

4.2.8 *Important Considerations and Implications Regarding Boundary Conditions and Return Periods* 8

5. MODELING SCENARIOS & COMPUTER FILES 9

5.1 VERTICAL DATUM 9

5.2 EXISTING (2004) CONDITIONS MODELS 9

5.3 FUTURE CONDITIONS MODELS 10

6. MODELING RESULTS 11

6.1 EXISTING (2004) CONDITIONS MAXIMUM WATER SURFACE ELEVATIONS 12

6.2 FUTURE CONDITIONS MAXIMUM WATER SURFACE ELEVATIONS 16

7. MASTER DRAINAGE PLAN IMPROVEMENTS 20

7.1. CAMELOT LAKE BYPASS 20

7.2. PORTSMOUTH OUTFALL – GUST LANE TO DEEP CREEK BOULEVARD 21

7.3. PORTSMOUTH OUTFALL – WEST OF U.S. 17 22

APPENDIX A. SUBCATCHMENT IMPERVIOUSNESS & SOILS PARAMETERS A-1
